Analog Way announces the LiveCore™ Output Expander

May 2014 – Analog Way is pleased to announce the LiveCore™ Output Expander, a new system to add 4 + 1 outputs to the SmartMatriX Ultra, Ascender 32 and Ascender 48. The LiveCore™ Output Expander will be unveiled at InfoComm 2014, from June 18-20 in booth #C7125.

To offer additional output capability on select **LiveCore™**-based Presentation Mixers, **Analog Way** introduces the **LiveCore™ Output Expander**.

Based on the **LiveCore™** platform, the **SmartMatriX Ultra, Ascender 32** and **Ascender 48** are 12x4 + 1 systems designed for advanced presentations in the staging or integration environment.

For applications requiring a larger number of outputs, the **LiveCore™ Output Expander** provides up to 4 additional outputs, plus 1 monitoring output.

The system comes in in three different references: **LOE016** with 16 scalers embedded for the **SmartMatriX Ultra**, **LOE032** with 32 scalers for the **Ascender 32**, and **LOE048** with 48 scalers for the **Ascender 48**.

Ethernet and link cables are provided with the **LiveCore™ Output Expander**. Once linked to its **LiveCore™** Switcher, outputs are shared and added resulting in a 12x8 + 2 scaled seamless Matrix system.

The **LiveCore™ Output Expander** models offer a downgrade mode providing higher flexibility in the management of rental stock. For example, a **LOE048** is capable of being linked with a **SmartMatriX Ultra** or an **Ascender 32**.

Units linked can be controlled through the **Web RCS**, the user-friendly user interface designed for the **LiveCore™** series, or through the brand new **Vertige™** Remote Console.

Analog Way will start shipping the **LiveCore™ Output Expander** in July 2014.

 Analog Way, Pioneer in Analog, Leader in Digital

Analog Way is a leading designer and manufacturer of presentation switchers and image converters with worldwide locations. The company designs a wide range of computer to video scan converters, scalers, seamless switchers and up/down converters. The products provide the most advanced solutions in the Broadcast, AV, Rental & Staging, Church, Corporate and Industrial markets.
